

Nilfisk Walk behind scrubber/dryers

Nilfisk BA 625/725/725C/825

Bigger performance for better productivity

When large areas of heavy traffic floor space need to be cleaned, the machine has to be up to the job. That's why Nilfisk have introduced the BA 625/725/825 series of walk-behind scrubbers. Powerful enough to handle heavy-duty applications, but without the high price tag of an industrial-class machine, these units offer the sensible solution to serious commercial cleaning situations.

Available in 3 scrub disc sizes – 61, 71 and 81 cm – plus a 71 cm cylindrical option, this range features a hefty 24 volt power pack for fast, effective and productive cleaning. Plus, as with all current Nilfisk scrubber/dryer models, EDS - ECO Dosage Solution is available to ensure accurate, economical and environmentally friendly detergent metering.

Nilfisk BA 625

The scrub decks are accessible without the need for tools and can be quickly and easily interchanged

Simple one-touch activation controls the entire cleaning operation, including the EDS – ECO Dosage Solution

Ideal for larger floor areas, these units are easy to operate and have excellent manoeuvrability

Added value through technical superiority

- Detergent metering system, EDS – ECO Dosage
- Solution, optimises the detergent mix and saves water (optional kit)
- Large 81 cm disc deck on a compact body to offer the best-in-class cleaning productivity
- Powerful 24 volt platform and adjustable scrubbing pressure gives productive cleaning of large floors and heavy traffic areas
- Choice of 3 brush deck sizes and a cylindrical deck plus accessory options ensure the right machine for each particular application
- Exceptionally low noise level permits cleaning anywhere at any time, even in sensitive areas
- Easy access to tank and batteries for cleaning and service and no-tool-needed access to scrub deck

Nilfisk BA 725C

Large opening for easy cleaning of the recovery tank

Easy change of EDS cartridge can be made in a matter of seconds

The EDS - ECO Dosage Solution – is your guarantee of precise detergent metering. The water-detergent mixing ratio is always accurate, never guesswork. Plus, the mixing takes place at the scrub deck – not in the tank, thus eliminating the need to empty and clean the tank since it only contains water. One bottle of highly concentrated detergent allows up to 20 water tank loads (of 76 litres) of operating time before needing to be changed or refilled. EDS offers better productivity by cutting cleaning time. Furthermore, on ECO Solution mode, water consumption is reduced by as much as 50%.

Customize cleaning through better features & more options

Soft-Touch™ and proportional speed adjustment paddle system provides superior comfort and safety

Large 76L solution and recovery tanks are made from heavy-duty polyethylene

Rear solution fill for simultaneous dump and refill

Large opening for easy cleaning of the recovery tank

Ultra-Flow™ squeegee system

Easy access to EDS can, just rotating front cover

Front shroud is no-tools removable for access to scrub motors and for interchanging scrub decks

System allows scrubbing with cylindrical deck

Tools-free replaceable and height adjustable splash skirt
